JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD**B. Tech IV Year I Semester Examinations, May/June - 2019****INFORMATION RETRIEVAL SYSTEMS****(Common to CSE, IT)****Time: 3 Hours****Max. Marks: 75****Note:** This question paper contains two parts A and B.

Part A is compulsory which carries 25 marks. Answer all questions in Part A.

Part B consists of 5 Units. Answer any one full question from each unit.
Each question carries 10 marks and may have a, b, c as sub questions.**PART- A****(25 Marks)**

- 1.a) What is a non-binary independence model? [2]
 b) What is a term frequency and normalized term frequency? Write down their equations. [3]
 c) Give an example that improves the effectiveness of Information retrieval system. [2]
 d) What is Ward's method in clustering? [3]
 e) What are semantic networks? [2]
 f) What is comparable corpus and parallel corpus? [3]
 g) What is meant by query processing? [2]
 h) What is a signature and how to construct signature file. [3]
 i) What is high-precision search? [2]
 j) What is structured data and what is the use of XML? [3]

PART-B**(50 Marks)****[10]**

2. Explain about vector space model in detail.

OR

- 3.a) Explain about retrieval strategies and their categories.
 b) What is smoothing in language model? Explain. [5+5]

- 4.a) Explain how Thesaurus are used to expand a query?
 b) Explain about the use of manually generated Thesauri. [5+5]

OR

5. Explain about:
 a) Resultset clustering b) Hierarchical Agglomerative clustering. [5+5]

- 6.a) What are the four core questions to cross the language barrier? Explain.
 b) Explain about document translations and query translations. [4+6]

OR

7. Explain the following in semantic networks
 a) R-distance b) K-distance [5+5]

8. Discuss about Duplicate document detection. [10]

OR

9. Explain about fixed length and variable index compression. [10]

10. What is distributed document retrieval? Explain the theoretical model of distributed retrieval. [10]

- 11.a) Explain briefly about advantages and disadvantages of combining systems of DBMS and Information retrieval.
b) Explain about Relevance feedback in relational model. [5+5]
