

Code No: 56031

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY, HYDERABAD**B. Tech III Year II Semester Examinations, December-2014/January-2015****COMPILER DESIGN**

(Computer Science and Engineering)

Time: 3 hours**Max. Marks: 75****Answer any five questions
All questions carry equal marks**

- 1.a) Explain in detail the process of compilation. Illustrate the output of each phase of compilation for the input “ $a = (b+c) * (b+c) * 2$ ”.
- b) Briefly explain the compiler construction tools.
2. Consider the grammar $E \rightarrow S+T \mid S-T; T \rightarrow V \mid V*V \mid V+V; V \rightarrow a \mid b$.
 - a) Obtain the FIRST and FOLLOWs of above grammar.
 - b) Construct Predictive parsing table for above grammar.
- 3.a) Describe the conflicts that may occur during shift reduce parsing.
b) Construct LALR parsing table for the following grammar. Show the actions of the parser for the string abab. $S \rightarrow CC \mid Cc, C \rightarrow cC, C \rightarrow c \mid d$.
- 4.a) Explain the detail about the specification of a simple type checker.
b) Describe the various types of three address statements.
- 5.a) Explain the data structure used for implementing Symbol Table.
b) How to subdivide a run-time memory into code and data areas? Explain.
6. Write short notes on the following:
 - a) Induction variable elimination
 - b) DAG representation
 - c) Loop unrolling and loop jamming.
- 7.a) Write about Data Flow Analysis of structural programs.
b) Explain various code optimization techniques in detail.
- 8.a) Explain the code-generation algorithm in detail.
b) Write a short note on machine dependent code optimization.
