j)	Write an Assembly language program for Addition of two numbers.	[2M]
	A Second of the Hillipers.	[3M]

(50 Marks)

Write a program for zero-, one-, two- and three-address machines to evaluate 2. $ax^2 + bx + c$, given the values for x, a, b, and c.

What are the basic differences between a branch instruction, a call subroutine 3.a) instruction, and a program interrupt.

List and explain various types of interrupts. b)

[6+4]

It is necessary to transfer 256 words from a magnetic disk to a memory section 4. 4. starting from 1230. The transfer is by means of DMA.

a) Give the initial values that the CPU must transfer to the DMA controller.

b) Give step by step account of the action taken during the input of the first two words.

OR

How many characteristics per second can transmitted over 1200-baud line in each 5. of the following modes? (Assume character code of eight bits)

25.0 1000 (

a) Synchronous serial transmission.

b) Asynchronous serial transmission with two stop bits.

c) Asynchronous serial transmission with one stop bits.

[10]

Explain the Set-associative mapping in detail. 6.a) A block set-associative cache memory consists of 128 blocks divided into four b) block sets. The main memory consists of 16,384 blocks and 256 eight bit words. How many bits are required for addressing the main memory? How many bits need to represent the TAG, SET and WORD fields? grana viene g**or** in a sing What is page replacement? List and briefly describe the algorithms used for page 7.a) replacement. What is paging? How virtual address is mapped with main memory address?[6+4] b) Explain in detail the addressing modes of 8086 with examples. 8. [10] 9.a) Give a note on flag register in 8086. Draw the minimum mode pin diagram for 8086. b) [5+5]10. Write a program to find transpose of 3×3 matrix. [10] OR Using 8086 instructions write recursive program to find the factorial of a number. 11.a) Convert BCD number to equivalent base-F number using 8086 instruction set. b) 200 100 Correlos el locales das de 15070 ...-00**O**00---ry o islanti sisb EADGISTAN **j**aran mengerakan dan dan mengan 12505 e **as** 源域 die de still Wale war come for the party 20 mpi nyaétan at kalimpil 激性 972 · 意数流压 os of spyllighten of ATTA 瓣 ner Carolina de Colonia de Carolina de 1,19,243 Service and the service of the servi \$74 de falligio de l'extre a del Para de Para de la Para de Para d gay da laith which trans to the comparts of
